ATS&R Selected by Chippewa Falls Unified Area School District

Minneapolis, MN – August 20, 2014 – ATS&R was selected by the Chippewa Falls Area Unified School District in Wisconsin to provide leadership in the development of their long-range facilities master plan. ATS&R will provide a comprehensive assessment that will be used to guide the District's future facilities investments while enhancing their academic mission and supporting program changes.

ATS&R's Dean Beeninga will serve as the educational facilities planner, with Kara Rise serving as the team's 21st century educational and referendum specialist and Dr. Tom Tapper providing educational adequacy planning and committee/group facilitation.

ATS&R Partner Dean Beeninga states, "We believe that school buildings are the physical expression and shape of a community's vision for educating its children. We will thoughtfully explore the District's key issues to make sure their facilities enhance and inspire teaching and learning, now and in the future. A successful plan begins with collaborative planning/design visioning where educators, citizen groups, community and district representatives have the opportunity to share and learn how the facilities can best serve the overall needs of the community. "

Thrilled to be celebrating 70 years in business, ATS&R specializes in educational facility design and offers comprehensive planning, architecture and engineering services. Our team provides quality and efficient professional services that revolve around integrity, fairness, and respect that enables the perpetuation of our firm...to serve as a model for others. With professional services including architecture, educational facility planning, mechanical engineering, electrical engineering, interior design, technology, site development, field administration, and total energy checkpoint, we partner to create designs that respond to our client's needs, mission, and values.
