Marshall Public Schools Selects ATS&R

Minneapolis, MN – July 17, 2014 – Marshall Public Schools in Minnesota recently selected ATS&R Planners/Architects/Engineers to assist the District in preparing a Comprehensive Long-Range Facilities Plan that identifies five, ten and fifteen year recommendations for new construction, expansion, renovation and/or other options for buildings and properties that support their educational vision.

Working on the plan, the ATS&R team will focus on several key elements including increasing student engagement, transforming learning environments, supporting early innovators, personalizing student learning and professional growth/development, enhancing communications, and collaborating with all stakeholders to make decisions. ATS&R feels passionate about these key elements and continues to research, refine, and incorporate 21st century educational approaches and delivery systems into our planning and design of educational facilities.

ATS&R Partner David Maroney states, “We look forward to continuing our work with Marshall Public Schools in the preparation of a comprehensive facilities plan that reinforces their commitment to excellence and supports their core values. Great solutions are the results of experience, listening, input, and collaboration!”

Thrilled to be celebrating 70 years in business, ATS&R is a planning, architecture and engineering firm that has specialized in educational facility design since 1944. ATS&R offers professional services including architecture, educational facility planning, mechanical engineering, electrical engineering, interior design, technology, site development, field administration, and total energy checkpoint.
